

Call for Resumes – Climate Change Adaptation Experts

Four Twenty Seven, a climate risk and resilience research and advisory firm, is currently soliciting resumes of experts for anticipated work on climate change adaptation in developing countries. We are seeking individuals with expertise in adaptation issues in developing countries, and sectors of interest are:

- Health
- Agriculture
- Natural resource management (biodiversity, forestry and coastal)
- Infrastructure
- Urban
- Water and sanitation
- Private sector
- Finance
- Planning
- Capacity building
- Governance
- Gender
- Monitoring and evaluation.

Working closely with the Director of Advisory Services as well as other members of the Advisory Team, experts will serve as consultants and provide inputs to technical assessments, decision-support, and on-the-ground assistance for implementation of adaptation activities in developing countries. Activities may require international or US travel.

Responsibilities

- Provide technical inputs to and support for donor-funded adaptation projects, including activities focused on:
 - Vulnerability, hazard, risk, and impact assessments
 - Adaptation planning, including the identification, assessment, and implementation of measures
 - Monitoring and evaluation of adaptation plans, strategies, and activities
 - Capacity building, stakeholder engagement, and training
 - Climate services
- Draft reports, papers, other written documents, and presentations for a broad range of audiences, including donors, local policy-makers, and development practitioners
- Conduct secondary and primary research on adaptation issues in developing countries
- Support other climate change-related projects and analyses as needed.

Requirements

- Outstanding analytical and writing skills
- Excellent communication skills, including the ability to convey complex ideas to non-technical audiences
- 5+ years' experience working in developing countries
- 5+ years' experience working on adaptation
- 3+ years' experience working on projects funded by bilateral or multilateral donors (e.g., USAID, World Bank, UNDP) and/or other significant funders
- MA/MS in International Development or other graduate degree in a relevant area (see above list)

To apply, send your resume and a cover letter, including availability, to Yoon Kim: ykim@427mt.com.

Application deadline: August 31, 2016. Later applications may be considered on a rolling basis.

About Four Twenty Seven, Inc.

Four Twenty Seven (www.427mt.com) is an award-winning, mission-driven research and advisory company dedicated to building climate resilience through social innovation. Four Twenty Seven helps business leaders and investors understand how climate change will impact their assets, price climate change risk in economic decisions, and invest in resilience.

Four Twenty Seven's fast-growing capabilities include climate risk modeling, vulnerability assessments, development of metrics, ratings and indices for benchmarking and evaluating, climate adaptation strategies, and training and stakeholder engagement. Our team comprises highly qualified professionals with backgrounds in climate science, economics and finance, natural resources management, policy analysis, public health, and international development.

Four Twenty Seven was a finalist for the prestigious Cartier Women's Initiative Award (2014), earned Climate Change Business Journal Awards for Climate Risk Management and Adaptation (2014 and 2015), took first prize in the ESRI Human Health and Climate Change Challenge 2015, and won the Verdantix Environment, Health and Safety Information Management Award (2016). The company was founded in 2012 and is headquartered in the San Francisco Bay Area, California.
